
The Board is charged with providing resources for complete, accurate, and timely financial information for those individuals, groups, and agencies responsible for managing the operations of the school system.

1. Management must be able to determine that financial operations comply with legal provisions in the federal, state, and county constitutions, charters, laws, policies, and administrative regulations which control the school system.
2. Management must be able to rely on properly classified and reported financial data in order to accurately evaluate past performance, to make decisions, and to plan future operations.
3. Legislative and policy-making bodies must be able to rely on essential financial information for program evaluation and budget planning.
4. The general public must be able to rely on financial reports which show the cost of services provided by the school system and the sources of revenues adequate to meet these costs.
